## SERVICE OFFERINGS

We provide a wide array of Intellectual Property Rights support services in diverse technology domains. In today's global marketplace, identification, research, development and protection of IPR is crucial to establish and evolve every business.

### PATENT DRAFTING

Our experts interview the inventors, attorneys and understand the disclosure document provided by you to prepare patent applications. Claims must be prepared to give the broadest protection while taking care of the laws. Specifications must be clear and enable any person skilled in the art to practice the invention.

### DRAFTING OFFICE ACTION RESPONSES

We make efforts to make sure that all issues raised by an Examiner are addressed. The response comply with Patent Office rules related to the laws, form and content of such responses. Our team endeavor to keep themselves updated with the latest cases and requirements.

### PRIOR ART SEARCH

A prior art search helps you to determine if an idea is novel before committing the resources necessary to file a patent application. We perform searches using Delphion, USPTO, EPO, IEEE, ACM, Google, Google Scholar, other databases, and customized search engines.

### PATENT INVALIDITY SEARCH

Invalidity searches are typically conducted to aid infringement litigations. The search is conducted with aim of uncovering prior art to invalidate or limit the scope of a patent. We use our proven methodology to understand the claims, search & read a prior art to help invalidate a patent.

### ACQUISITION ANALYSIS (VALIDITY SEARCH)

Validity searches are typically performed to assess the strength or value of a patent for licensing, negotiation, and procurement of IP assets. Validation search is conducted in a fashion similar to invalidity search. We can grade the strength of a patent based on the validity search.

### CLAIM CHARTING

We perform comprehensive analysis of patent claims and map them with a product's features or a competitor's patent claims. It enables attorneys and business managers to understand the scope of a patent or a product.

### PATENT/TECHNOLOGY LANDSCAPING

Patent landscape analysis is a comprehensive analysis of patents or patent portfolios to enable strategists, scientists and attorneys to take key decisions in new product development and R&D planning. Our experts perform rigorous taxonomy generations, data mining, data analysis and data visualization to generate patent landscape that helps you to identify competitive trends and technology white spaces.

### PATENT ILLUSTRATION

Patent drawings are critical to any patent application. Our team of illustrators prepare both simple and complex drawings as per the legal requirements based on rough sketches or CAD files. The team is equipped with MS Visio and CAD software.

### OTHER RELATED SERVICES

All the services can be customized for you. We also provide various other services that help in developing, analyzing and supporting your IP. Some of these include:

- Clearance Search
- Product Infringement Analysis
- Expert Witness Support
- Patent valuation and Monetization
- Docket Management
- Document Proofreading
- Paralegal Support
- Trademark Search and Filing in India
